DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-47 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent Number 6,332,913 to Breitschwerdt et al. With respect to independent claims 1, 23, and 46, Breitschwerdt et al disclose a hydrogen generator comprising a membrane module of the stacked plate type for selective hydrogen separation. The module is formed by stacking plates on top of each other and is used in a mobile hydrogen generating unit which supplies a fuel cell with pure hydrogen. The module includes a hydrogen separation layer 7, a supply layer 15, 16, 19 for a hydrogen-containing gas mixture (reformat), and a hydrogen extraction layer 5. The module shows gas inlets 22, 23 for the reformat and gas outlets 10, 11 for the pure hydrogen. Reformat and purified hydrogen are guided counter-currently. The hydrogen can be discharged by means of a flushing gas. The dependent claims merely refer in an exemplary manner to features known per se and which would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art when separating hydrogen by means of hydrogen selective membranes.
